

PRODUCT CATALOG

Mobile modular C QB training systems that turn any space into realistic training arena.

TRANGO
SYSTEMS
MODULAR TRAINING INFRASTRUCTURE

— 2026 —
www.trango-sys.com

Trango Systems designs and manufactures modular tactical training infrastructure for professional military and law enforcement units. Built for realism, safety, and mobility, its solutions enable fast deployment, flexible reconfiguration, and efficient long-term use across a wide range of training scenarios.

Advanced Material: all products are made of Panel-O-Foam™ - a patented composite manufactured exclusively for Trango Systems. It allows for a light weight, safety, and durability.

MODULAR TRAINING STRUCTURES

Trango Systems' modular training structures are designed to create realistic, reconfigurable environments for tactical training. This includes wall-based and tunnel-based systems that support different layouts, training objectives, and expansion paths.

Modular structures include interconnectable systems:

Wall-based

Tunnel

Shared Modular Logic

All structures follow the same modular principles: deployable systems, reconfigurable layouts, scalable build-up, and compatible connection logic across training environments.

Modular by Design

Reconfigure layouts with the same core elements.

Built to Scale

Start with one setup and expand over time.

Deployable

Easy for transport, setup, and repeated use.
No ground preparation.
Tool-free assembly.

Mission-Focused

Support different training environments within one structural category.

The following pages show how each modular structure system works and how its configurations are built.

WALL-BASED STRUCTURES

HOW IT WORKS

Trango' mobile modular structures are built around one scalable system. Using the same core building elements, units can create different training environments and expand over time.

Common components

Standard packages

Multiple configurations

CORE COMPONENTS

The common building blocks used across multiple structures

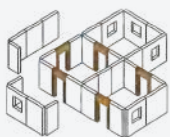

STANDARD PACKAGES

Core Components are organized into Packages

Package 200		Door Package		Package 100		Stability Package	
Wall 200	x4	Wall 200	x4	Wall 100	x4	Corner	x1
Window 200	x1	Door	x1	Window 100	x1	J-Hook	x2
Window Cover	x1	Beam 200	x1	Spider	x1	Klamra	x6
Beam 100	x1	Spider	x1	Stability Package	x1	Patch	x3
Spider	x1	Stability Package	x1				
Stability Package	x1						

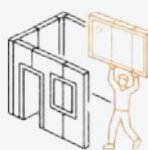

These packages can be ordered separately, to create a new setup or scale up an existing one.

Lego-Like Modularity

Basic configuration changes in minutes.

Lightweight

The weight of one wall panel - **27 lbs / 12 kg**

Weather-Resistant

Extreme temperatures, UV radiation, rain or snow.

MODULAR SHOOT HOUSES

Trango Systems' modular shoot houses are designed to create realistic CQB training layouts of different sizes and complexity levels.

Configurations range from compact starter layouts to large-scale multi-room structures.

OPS BOX CONFIGURATIONS

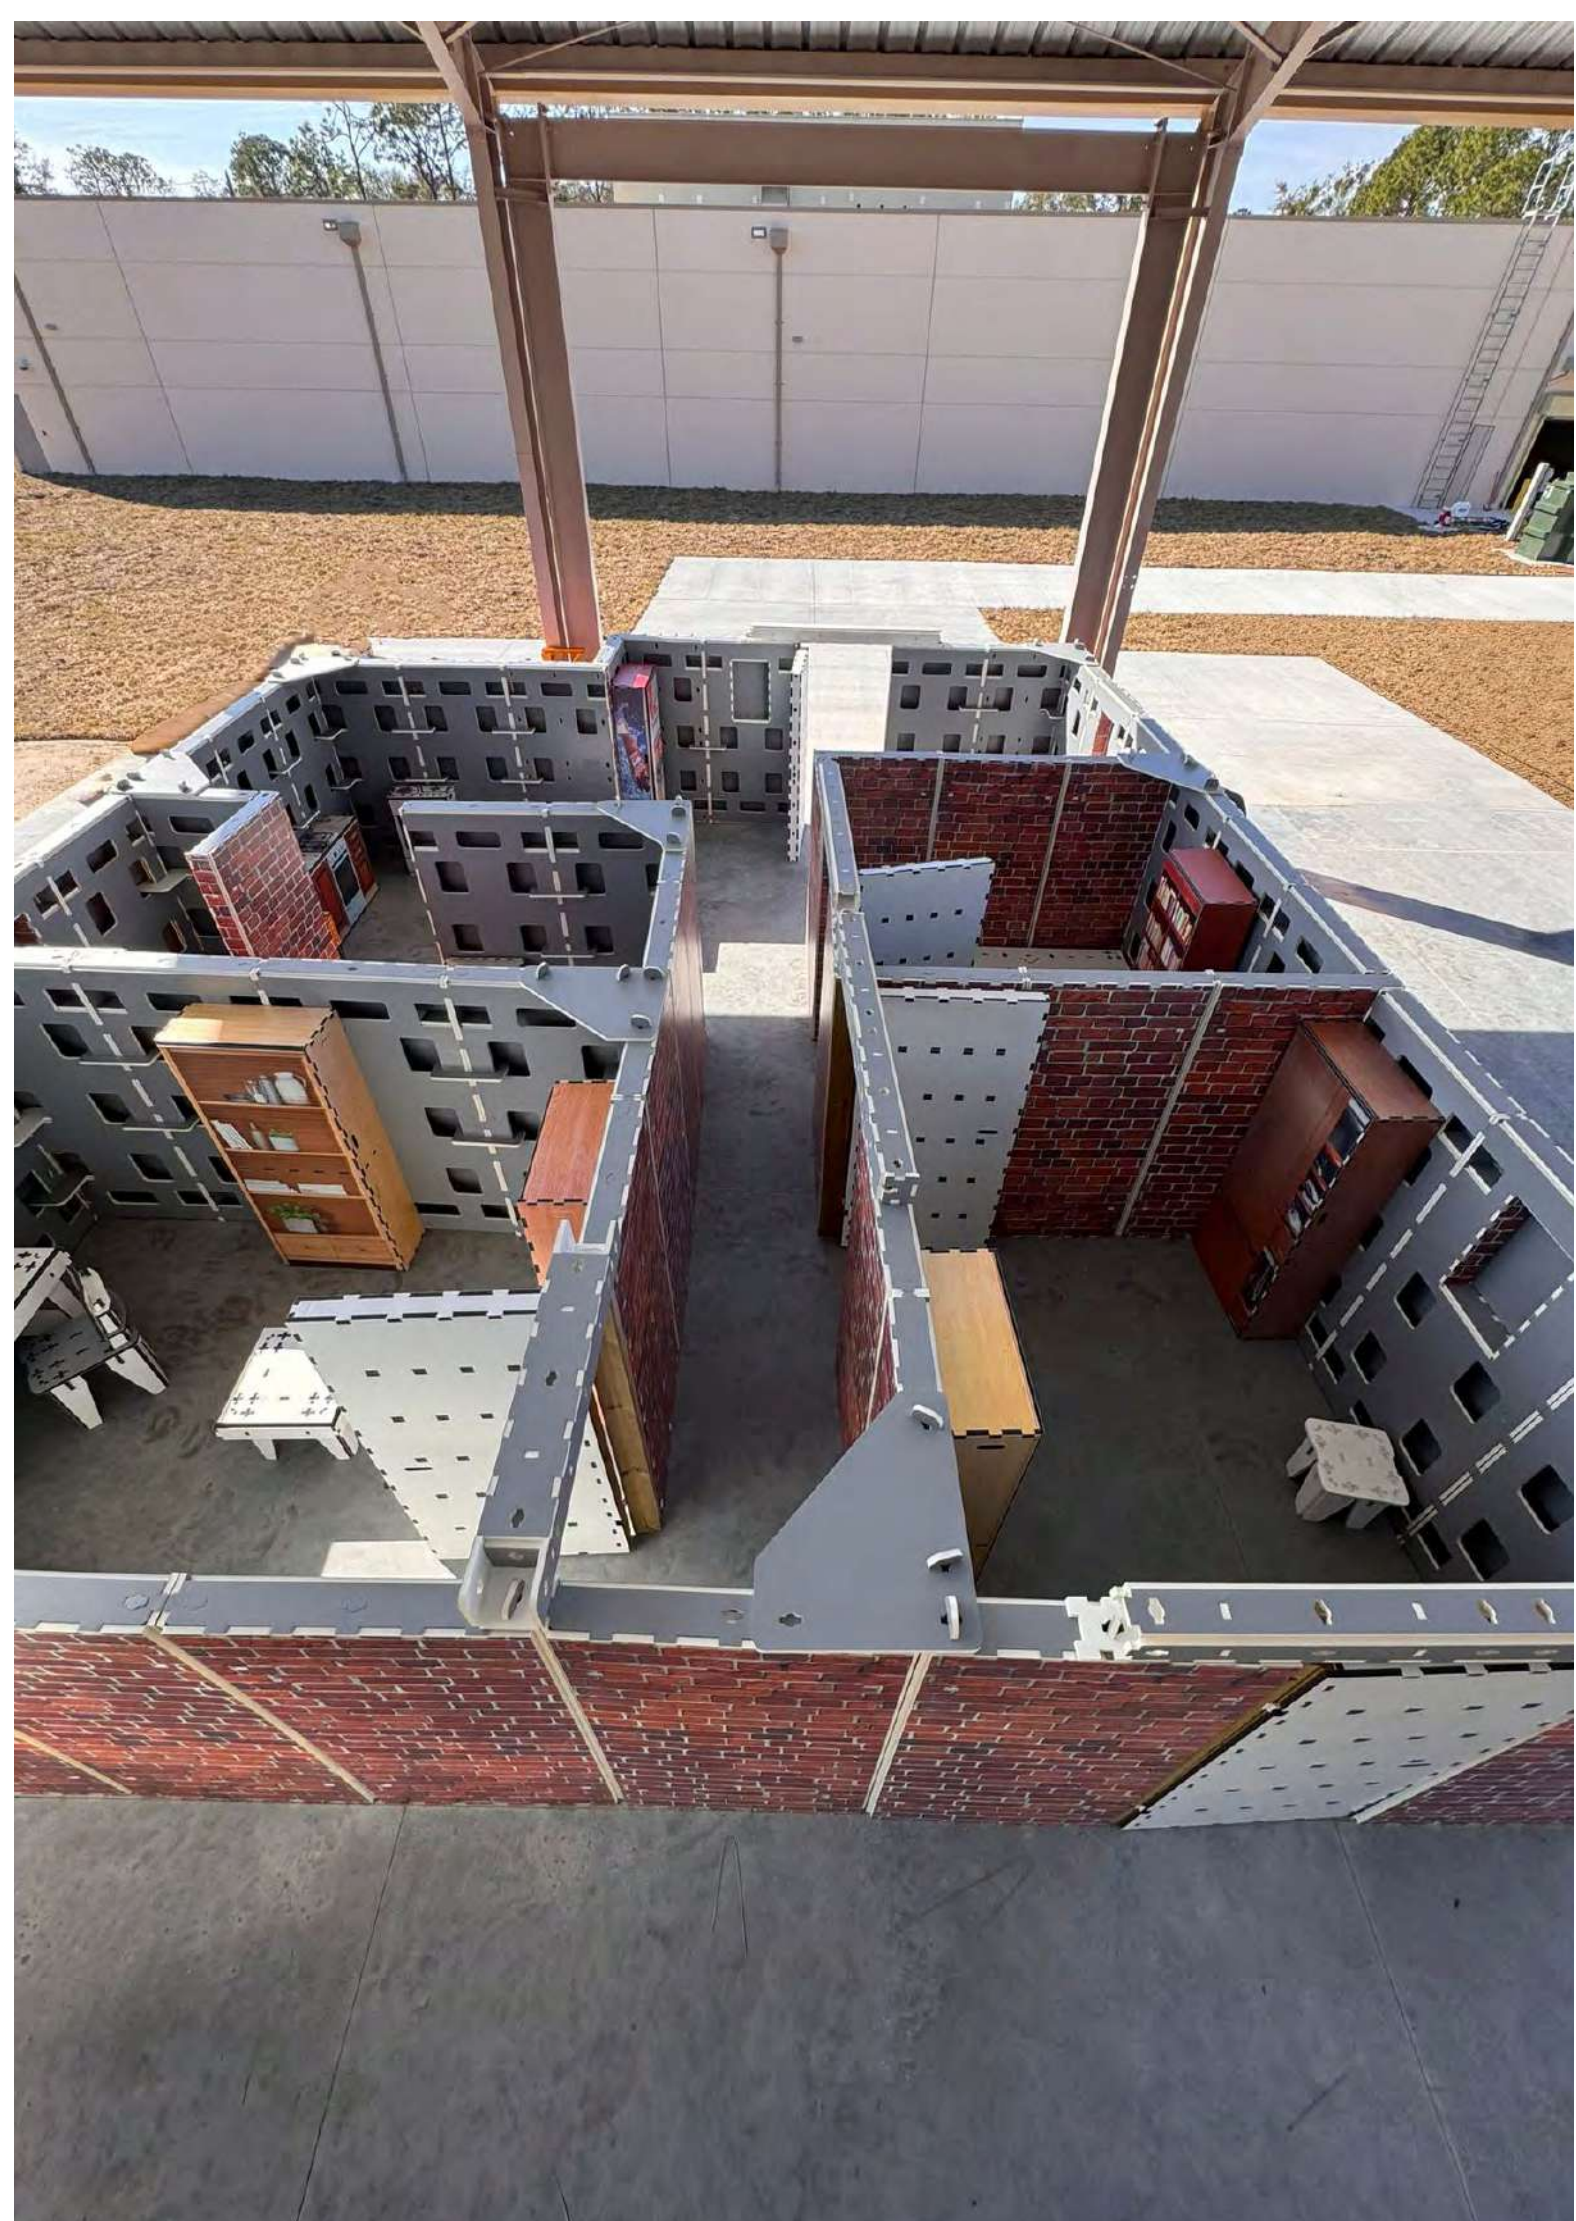

CONTAINERIZED SHOOT HOUSE SYSTEMS

OPS Box configurations combine a modular shoot house with a deployable container platform, elevated viewing position, and breaching elements. The result is a transportable wall-based training setup built around selected Shoot House models.

WHAT'S INCLUDED	CONTAINER DIMENSIONS
Container with breaching door and breaching window	With platform and ladder13 x 11 x 20 ft4 x 3.4 x 6 m
Viewing platform and ladder	Without platform and ladder9 x 8 x 20 ft2.6 x 2.4 x 6 m
Shoot House - Advanced, Expert, or Pro	

Deployability The OPS Box platform can be transported by land, sea, or air. All components can be packed within the container for transport and storage.

SWAT STREET TRAINING KITS

Modular street-setting for realistic urban movement, positioning, and scenario-based tactical training.

SWAT Street kits create modular street-style training layouts for open-area tactical drills. They are intended for movement through urban lanes, angle management, use of cover, and team coordination in less confined environments than enclosed structures.

Built on the same wall-based modular logic used across Trango’s broader structural systems, these kits can be deployed, reconfigured, and expanded as training needs grow.

CQB TRACKS

Modular lane-based kits for close-range movement, angle, and engagement drills.

CQB Tracks are modular training kits designed to create lane-based layouts for close-range movement and engagement drills. They support controlled work on angles, exposure, barricade use, and movement through defined modular paths.

Built on the same wall-based modular logic used across Trango’s structural systems, CQB Tracks can be deployed, reconfigured, and scaled through three kit levels.

Available Configurations

STRUCTURE C COMPONENT KITS

Structure Component Kits provide standard wall-based packages used to build, expand, and adapt Trango's modular structures. **Stability Package** serves as the common connector and support kit across the wall-based system. It is included in the main structure packages and can also be ordered separately as an individual product.

Stability Package

Common connector and support kit used across wall-based layouts.

Included in all Structure C component Kits.

MODULAR TUNNEL SYSTEM

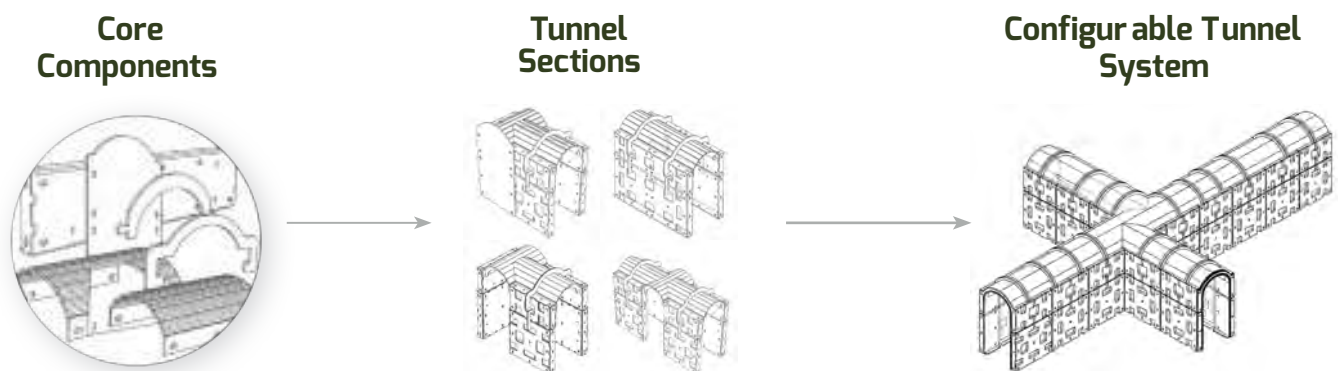

HOW IT WORKS

Each tunnel section is built from shared core components.

The Tunnel System is formed by combining four standard section types: Tunnel 200, Tunnel-T, Tunnel-L, and Tunnel-X.

The Sections are organized into **Tunnel Kits** that are used to build tunnel layouts of different sizes and complexity.

Using Trango's common connectors, tunnels can also be integrated with wall-based systems to create broader modular training setups.

BARRICADES

Trango's barricades support positional shooting, angle drills, and varied weapon placements. They can also be integrated into broader modular settings, are included in CQB Tracks configurations, and can connect with other Trango structures through the same compatible system logic.

At 6" (15 cm) thick, these barricades create more realistic shooting conditions. Unlike thin barricades, they require trainees to work with real weapon positioning, offset, and shooting angles.

BARRICADE MODELS

Available barricade models with shared base format and configuration-specific cutout patterns.

All models below are supplied with two Barri-Legs and share the same dimensions and weight.

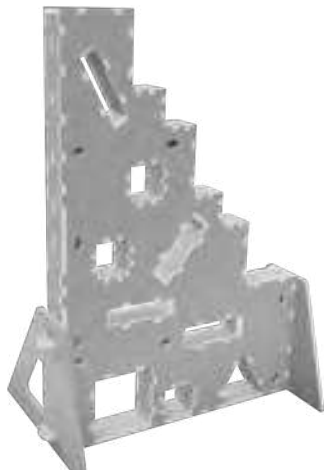

Dimensions	Weight
48x72x6" 120 x 180 x 15 cm	30 lb 14 kg

SHOOTING RANGE TARGETS & EQUIPMENT

Trango Systems' targets are engineered from the ground up to provide a superior training experience, focusing on durability, safety, and all-weather performance. The primary benefit of Trango targets is their exceptional resilience. The

targets are engineered to absorb >12,000 rounds of 5.56mm and >6,000 rounds of 9mm hits without breaking down.

This extreme durability translates directly into fewer replacements, more consistent training, and significant long-term cost-effectiveness.

The product range includes:

MOVING TARGET **LIAM**

The LIAM Moving Target is a modular, remote-controlled system that combines a 4x4 moving platform and high-durability ricochet-free targets.

Maneuverable
Smooth movement in any direction on different terrain types.

Remote Control
Exceptional precision. Operational range up to 1,300 feet (400 m).

Customizable
Changeable targets to accommodate different training scenarios.

Safe
Ricochet-free for enhanced safety.

VEHICLES

TARGETS & 3D CARS

Trango's vehicle category includes vehicle targets for shooting practice and 3D cars for more realistic situational and tactical training. These products are designed to support vehicle-based drills, cover use, and angle work in urban and field settings.

The product range includes:

Flat vehicle targets for creating more realistic street environments and shooting practice.

Full-size functional 3D vehicle models for realistic tactical and situational training in urban or field environments.

Ricochet-Free

Safe training environment. No risk of ricochet or splinter.

Long-Lasting

Strong, able to withstand extreme weather conditions and thousands of live-fire rounds.

Lightweight

Easy to move, transport and reinstall.

Realistic

Full-size vehicle forms for realistic cover, angle, and movement drills.

All vehicle targets are supplied with 2 stands.
Bike targets are supplied with 1 stand each.

VEHICLE TARGET KITS

Vehicle targets are supplied with stands: standard vehicle targets include 2 stands per target, bike targets are supplied with 1 stand each.

FUNCTIONAL 3D VEHICLES

Trango's Functional 3D Vehicles are real-size vehicle models designed for tactical and situational combat training in realistic environments. They allow units to practice shooting from different angles, movement around the vehicle, and engagement from within or outside the vehicle, adding a full-scale physical element to urban and field training scenarios.

HOUSEHOLD & OUTDOOR **FURNITURE KITS**

Trango's Household & Outdoor Furniture Kits are designed to create more realistic residential and exterior settings for tactical training. Arranged as kits for different household and outdoor scenes, they help units build more varied environments for room-clearing, movement, and scenario-based drills, while still allowing individual items to be moved and reconfigured as needed.

All household and outdoor items are arranged into kits according to standard rooms or house spaces. Each kit is packed in one box with fixed weight and dimensions, for your convenience.

The following pages show details on each kit.

LIVING ROOM M KIT

CN: 40000025935

Bookcase | x1

Dimensions:
