

# Amidon Ballistic Concrete Repair Kit

## *Self Repair Materials and Instruction*

Proper maintenance and repair of a live-fire shoot house is essential to safety and sustainability of a valuable asset. 360° Ballistics is the maker of Amidon Ballistic Concrete and builder of shoot houses and MOUT villages for the US military for over 25 years and we provide the only Amidon branded, fully tested shoot house repair system available. We provide the additives and instruction needed to perform repairs and bring your ballistic shoot house back to original working order. The GTSS specifies that only Amidon Ballistic Concrete repair kits are to be used for all shoot house repairs.
